1. This action is in response to the application filed on July 30, 2001. Claims 1-13 are pending.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. In the claims:

A) in claim 13,

1. in line 5, changed "first power supply" to --first power source--.

4. The above examiners amendment was necessary in order to place this application in condition for allowance and to provide proper antecedent basis for the phrases referring to "the first power source". It is believed that applicant intended to use "source" rather than "supply". However, if applicant does not agree with the change made by the examiner, the examiner will enter a 312 amendment for correcting the above problem.

5. The following is an examiner's statement of reasons for allowance:

The prior art describes the use of uninterruptible power supplies (UPS) in combination with single and dual source power supplies as described by applicant in the Background of the Invention.

The claimed invention is allowable over the art of record because the art of record does not teach or suggest a method, computer readable form or apparatus for supplying power to an electrical device with power couplings used

Art Unit: 2115

in establishing contact with a first power source and a second power source in a normal operation state, the power supplying system comprising a UPS in line between the second power source and the electrical device, the UPS not being in line between the first power source and the electrical device, a switch used for supplying power to the device from a member of the group consisting of the first power source, the second power source, and a combination thereof, first and second sense circuits identifying a power failure in the first or second power sources respectively, and a controller that implements instructions to the switch based on a sensed power failure as claimed in independent claims 1, 7 and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
